

ASLM2018 Session

Date: Tuesday, 11 December 2018

Time: 14:30-16:00

Transcorp Hilton, Abuja, Nigeria
Kano room

Integrated Multi-disease Testing from Theory to Practice: Generating Efficiencies and Building Programmatic Bridges

Optimising and efficiently utilising resources is key to effective laboratory services. This session will provide evidence and lessons learned to support setting up systems, adoption and scale-up of processes for the optimal use of resources, efficiencies and mutual benefits of integrated multi-disease testing in the context of optimised diagnostic laboratory networks.
